

AMENDMENTS

Kindly amend the claims as follows:

1. (currently amended) A lighting clip fixed on a portion of an edge of a transparent or semi-transparent panel in a removable or permanent way, and supplied by an electric power system, said clip comprising ~~a section having one side open, joined with a connector, a first and a second clamping arm, and an internal space; said section equipped with~~ one open side, a first clamping arm and a second clamping arm, a connector joining said clamping arms, and an internal space wherein at least one source of light is placed in the internal space, which source of light illuminates a portion of the panel and wherein the section clip is in form of an elastic, self-supporting shape, the clamping arms are completely linear, and the first clamping arm is diagonal to an external surface of the panel.

2. (previously presented) The clip, according to Claim 1, wherein the clamping arms are of different lengths.

3. (previously presented) The clip, according to Claim 1, wherein the clamping arms are of equal length, and both arms are diagonal to a surface of the panel.

4. (canceled).

5. (currently amended) A lighting clip fixed on a portion of an edge of a transparent or semi-transparent panel in a removable or permanent way, and supplied by an electric power system, said clip comprising ~~a section having one side open, joined with a connector, a first and a second clamping arm and an internal space; said section equipped with~~ one open side, a first clamping arm and a second clamping arm, a connector joining said clamping arms, and an internal space wherein at least one source of light is placed in the internal space, which source of light illuminates a portion of the panel and wherein the section clip is in form of an elastic, self-supporting shape and the clamping arms are completely parallel to each other.
